

LEAGUE OF DEFENSE COMPANIES OF UKRAINE

NON-GOVERNMENTAL ORGANIZATION

ABOUT LEAGUE

“League of defense companies of Ukraine” is a non-governmental association of national private manufacturers of armaments and military machinery.

Today, Ukrainian private defense companies fulfill more than 60% of the state defense order. During the 6 years of the war, private enterprises created, adopted and delivered to the Armed Forces of Ukraine more than 200 samples of weapons, machinery and other military products. Most of them are the members of a public association “League of defense companies of Ukraine” (League).

For today, the members of the league are 67 domestic companies - manufacturers of defense products. Areas of activity:

- Armored vehicles
- Unmanned vehicles
- Warships
- Military aviation
- Radar surveillance and electronic warfare
- Communication and information protection
- CBRN protection
- Tactical medicine
- Military electronics and devices
- Modernization of military machinery and armament of combat aircrafts
- Personal weapons and equipment
- Simulators etc

MAIN TASKS:

- participation of League members in effective and high-quality rearmament of the Armed Forces of Ukraine
- protecting the interests of member companies of the League and creating attractive conditions for their activities
- improvement of public-private partnership in the defense-industrial sphere
- creation of equal conditions for private and state enterprises in the market of armaments and military machinery of Ukraine
- promoting products of member companies of the League in Ukraine and in foreign markets

ARMORED VEHICLES and SPG

Members of association have powerful production cluster of armored vehicles. Enterprises with many years of experience in this field are able to produce armored vehicles to perform a wide range of tactical tasks on the battlefield or during the protection of public order. We are able to modernize existing models, which have been demonstrating their reliability in different parts of the world for years, and provide a full cycle of production of our own models of armored vehicles, some of which have already established themselves in the Ukrainian Armed Forces and other military formation.

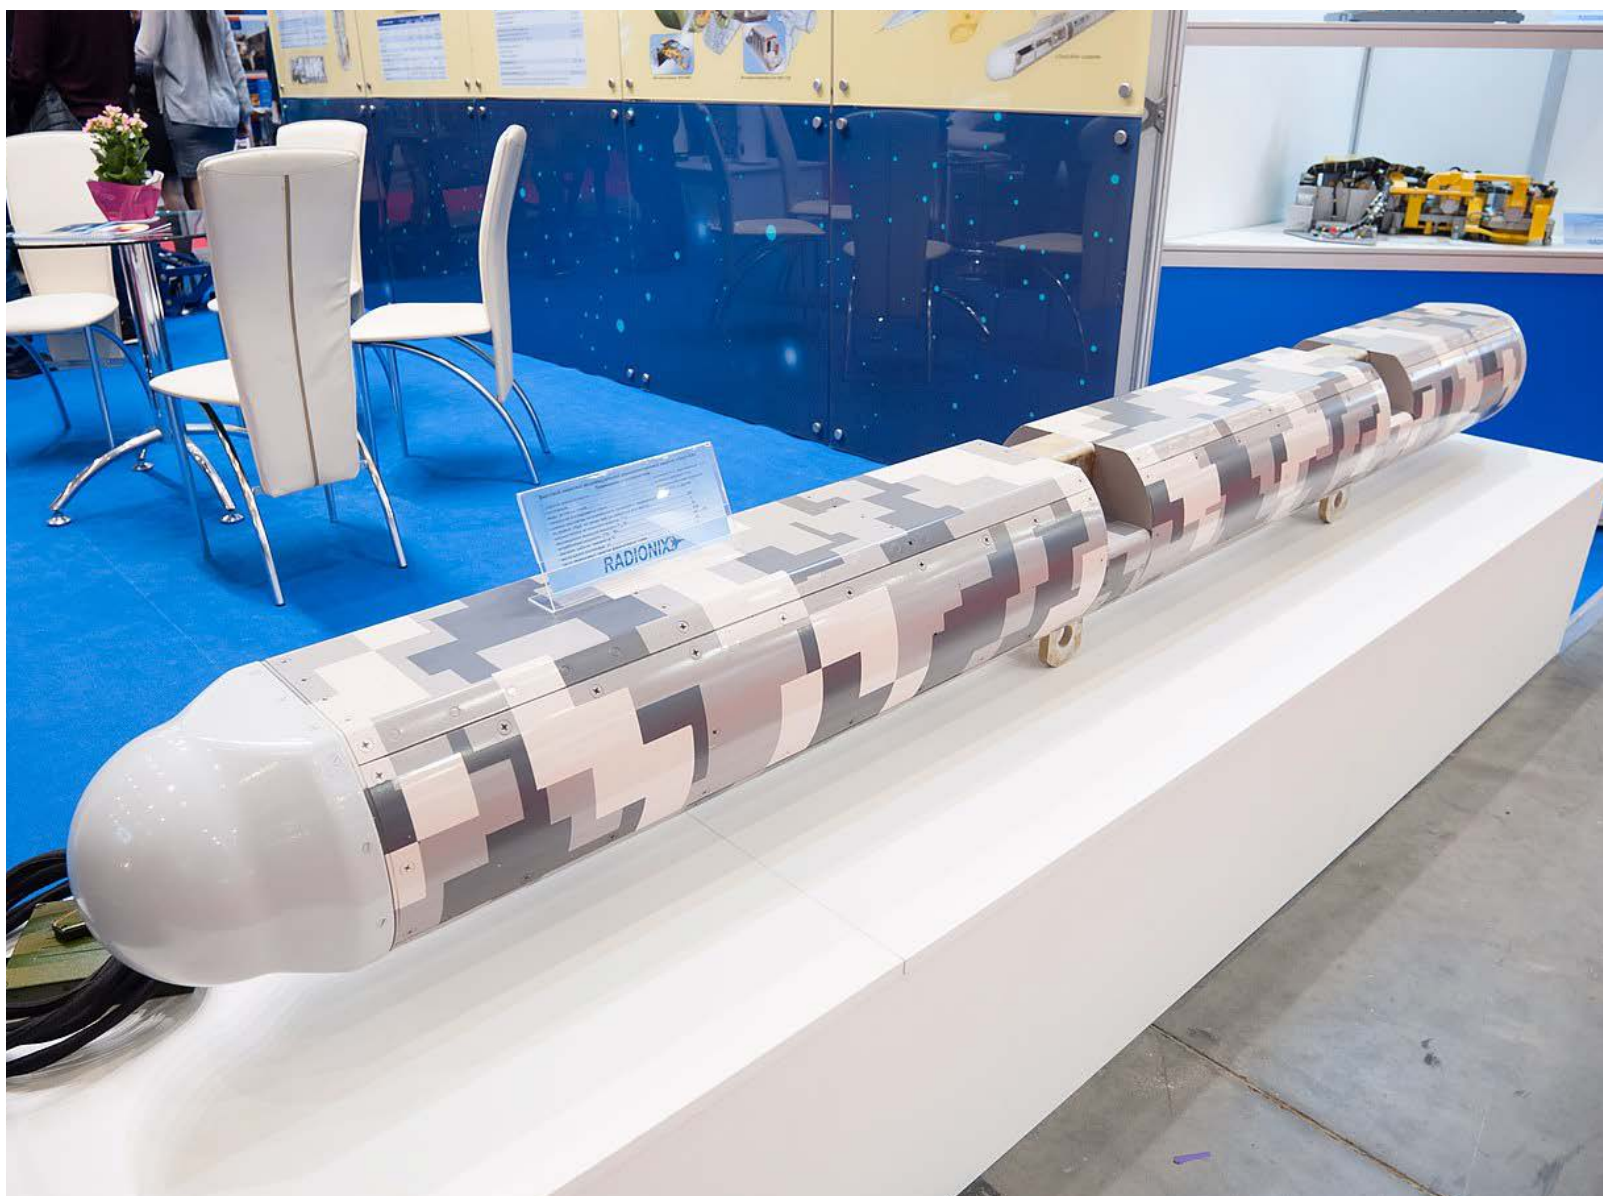

WE OFFER:

- APCs 6x6, 8x8
- MRAPs
- Self-propelled artillery
- Vehicles for police and special forces
- Modernization and repair

AVIATION

Leading private aviation companies have united around the League. Our participants are able to provide aircraft engines, seeker heads and other aircraft equipment. Many years of experience, well-established system of technical support allows us to be competitive all around the world.

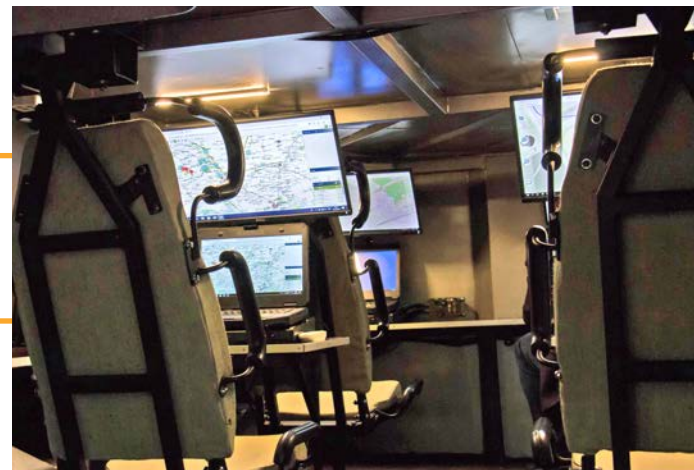

WE OFFER:

- Modernization and repair of MI family helicopters
- Production of turboprop, turbojet, turbofan engines
- Development, modernization and production of air traffic control systems
- Aircraft protection systems and complexes against guided missiles equipped with infrared homing heads
- Onboard radio-electronic protection systems
- Repair and modernization of avionics
- Development and production of homing heads

COMMUNICATION AND RADARS

A wide range of radar, electronic warfare and telecommunication systems are manufactured by entrepreneurs who have been able to demonstrate the effectiveness of their technology many times.

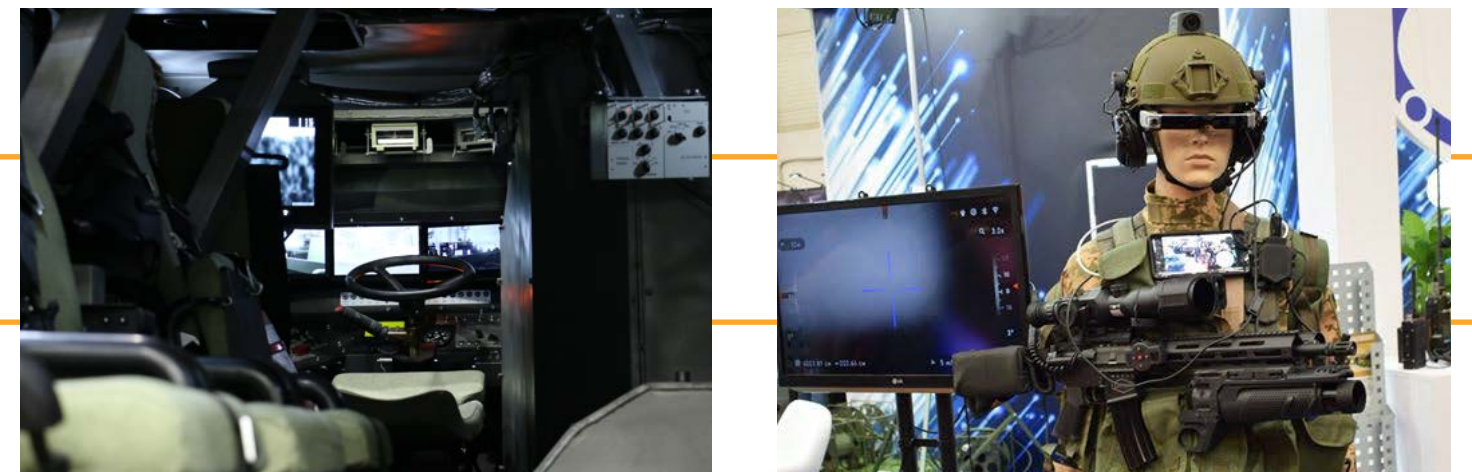

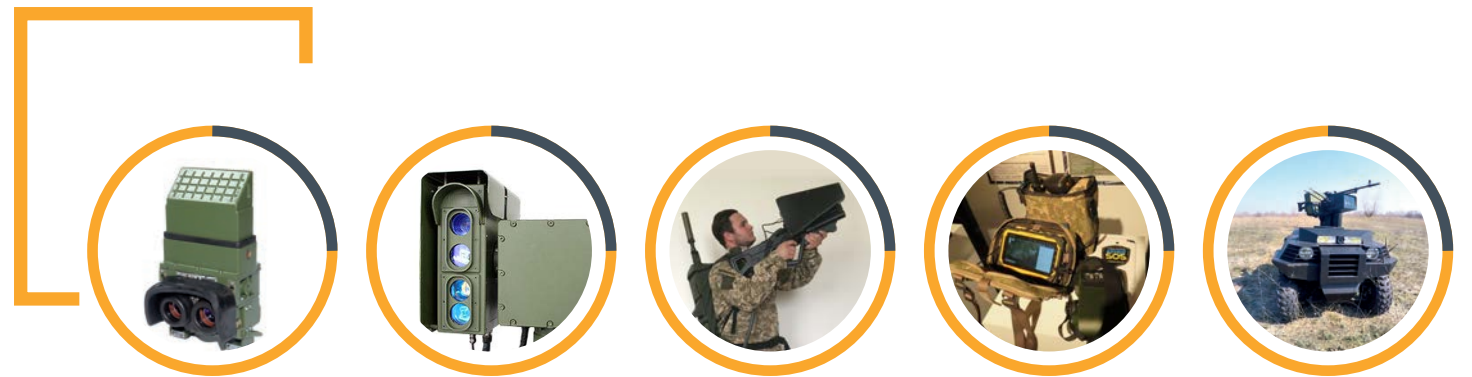

WE OFFER:

- Jammers
- Ground radiolocation systems
- Military radio stations
- Products for cryptographic and technical protection of information
- Design, construction, setup of specialized technological and operational radio communication and alert systems

HIGH-TECH PRODUCTS

Against the background of armed confrontation with the aggressor, Ukrainian private enterprises began to actively develop the sector of high-tech military equipment. The products of League members are designed to meet the needs of the army in modern military conflict.

WE OFFER:

- Unmanned aerial vehicles
- Unmanned robotic platforms
- Control systems for unmanned vehicle
- Optical system for detection and targeting observing systems
- Combat systems of the tactical link
- Systems of “transparent” armor
- Anti-drone systems
- Reconnaissance and artillery guidance systems

CBRN PROTECTION

The products of the League members provide an opportunity for safe and efficient performance of tasks even in the most aggressive environment.

WE OFFER:

- Radiometers and radiation warning devices
- Shipboard radiation monitoring equipment
- Gas-masks
- Protective clothing

SHIPBUILDING

Shipbuilding facilities with more than 100 years of history of manufacturing military and civil ships. Highly qualified staff and management with many years of international cooperation experience are able to ensure effective contract execution.

WE OFFER:

- Assault ships
- Small armored artillery ships
- Medium reconnaissance ship
- Marine artillery systems

SPECIALIZED VEHICLES

The following technique is designed to perform very specialized tasks. Although most of them do not involve direct participation in battles, nevertheless, their role in ensuring the functioning of the army cannot be overemphasized.

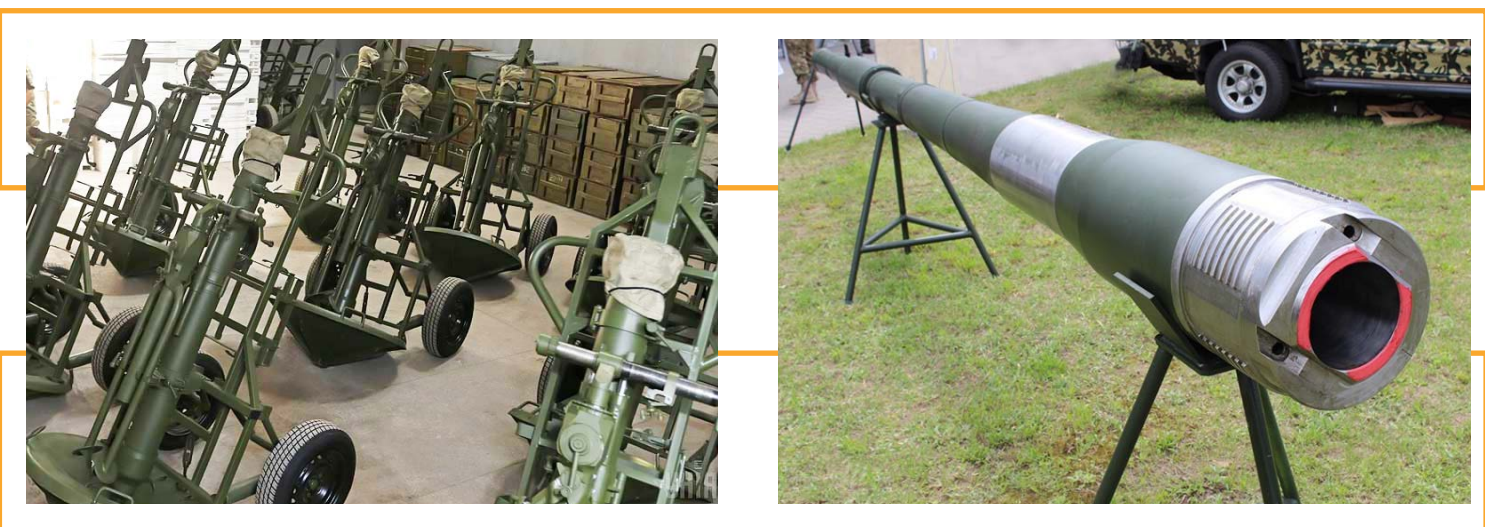

We offer:

- Command vehicles
- CBRN reconnaissance vehicles
- Earth-moving machines
- Vehicles for mine clearance teams
- Mobile bath-laundry complexes
- Fire trucks

WEAPONS AND AMMUNITION

Weapon – is the main tool of the soldier and the ammunition – is something that can never be too much. The enterprises of the League are able to provide their customers in sufficient quantity the first and second.

WE OFFER:

- Large-caliber sniper rifles
- Rifles
- Revolvers
- Traumatic weapons
- Smoke grenades and sound and light-signal mines
- Ammunition
- Signal flares
- Barrels for artillery systems
- Modernization of firearms

INDIVIDUAL EQUIPMENT

Individual protection is a special kind of military production: life of each individual soldier on the battlefield depends on its reliability. Ukrainian manufacturers understand this very clearly, because their products protect our military every day and help them carry out combat missions.

WE OFFER:

- Body armor
- Armor plates
- Ballistic helmets
- Ballistic shields
- Tactical notebooks
- Special purpose diving equipment
- Thermal imaging monoculars

LIFE SUPPORT SYSTEMS

Tents, energy sources, climate control systems, which are supplied by members of League, will ensure the functioning of the field camp even in extreme conditions.

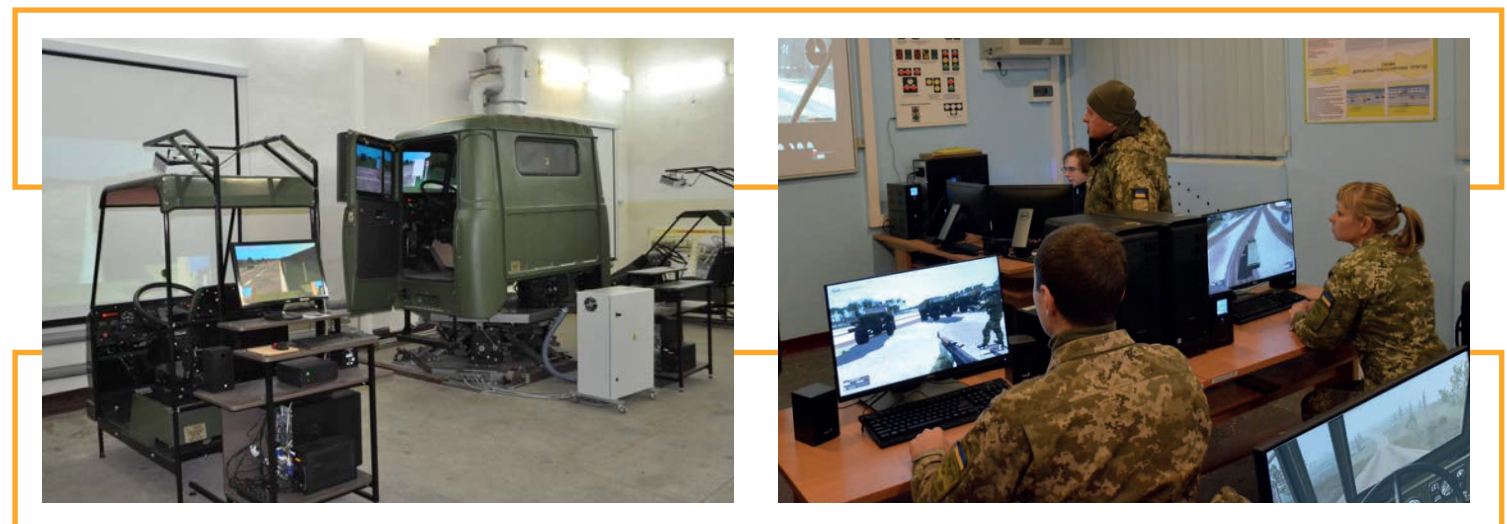

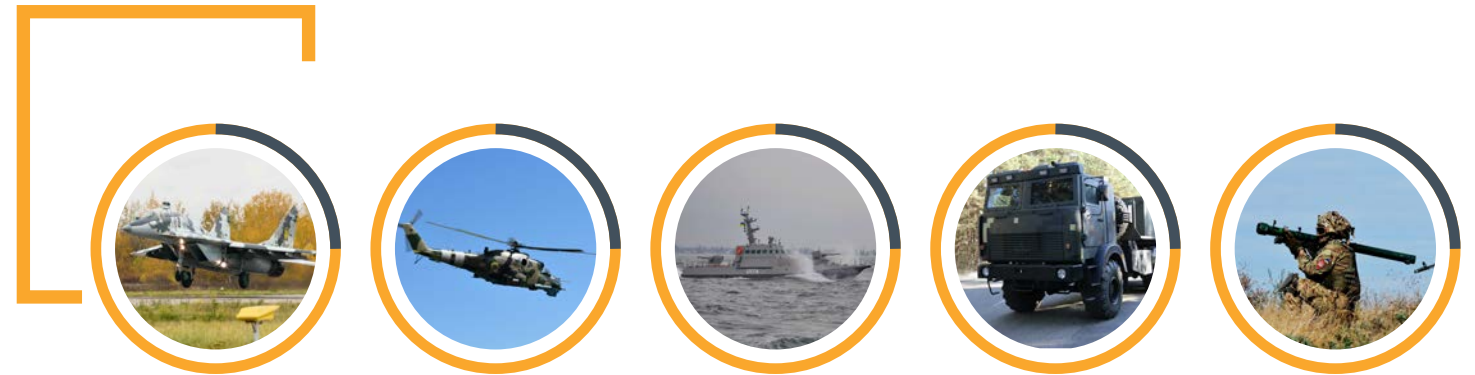

WE OFFER:

- Heating, ventilation, filtering systems
- Development and production of specialized diesel generators
- Uninterruptible power supply
- Measuring instruments and analyzers of power grid
- Tents for field hospitals, personnel etc.

SIMULATORS

Simulators based on modern software will optimize and speed up the process of team training, mastery of firearms, ground vehicles and aircrafts.

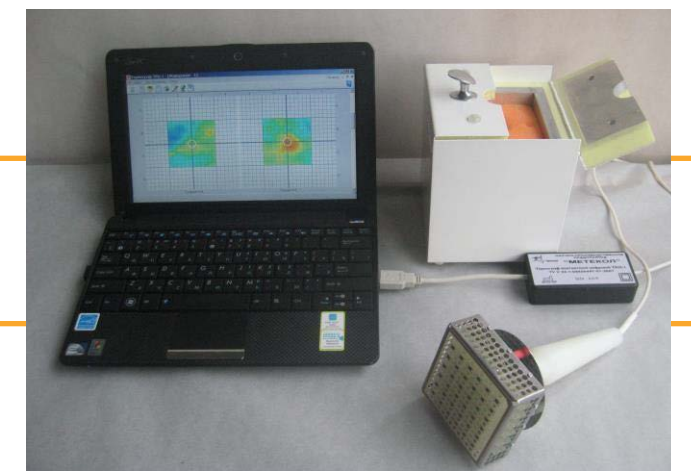

We offer:

- Combat simulation systems
- Simulators for different types of military aircrafts
- Simulators for different types of military ground vehicles
- Simulators for improving shooting skills

TACTICAL MEDICINE

The products of tactical medicine are created by specialists on the basis of wide experience of use in combat conditions.

WE OFFER:

- Hemostatic solutions
- Tactical first aid kits
- Diagnostic complexes
- Cardio Defibrillators
- Field hospital modules

ARMORED STEEL AND METALWORKING

In addition to ready-made products, League members can offer a wide range of steel and capacity for its processing.

WE OFFER:

- Ballistic and alloy steel
- Armored glass
- Metal cutting and rolling
- Galvanic coating
- Casting of blanks, including casting of non-ferrous metals in the die under pressure
- Machining of metals on CNC machines (milling, drilling etc.)
- Painting of products in modern painting chambers
